

A National Cancer Institute  
Designated Cancer Center

## **Endowed Chair in Tobacco-Related Malignancies**

The Hollings Cancer Center and the Division of Medical Oncology/Hematology at the Medical University of South Carolina (MUSC) are excited to announce an opening for a clinical/translational research leader to further develop the lung and head and neck cancer programs. This position will hold a \$2M endowed chair and will have authority over funds currently totaling \$5M. Candidates should have a national reputation in lung, head and neck or other tobacco-related cancers, demonstrated ability to carry out clinical and/or translational research, a solid record of collaborative, funded research (peer-reviewed and/or industry) and evidence of leadership ability. The Hollings Cancer Center received National Cancer Institute Designation, and has state-of-the-art clinical, research and shared resource facilities including a state-wide clinical trials network.

Located on the Atlantic coast in South Carolina, Charleston boasts one of the nation's most historic downtown areas and offers a superb quality of life including easy access to ocean beaches, extensive outdoor recreation, internationally renowned arts and cultural events.

Interested individuals should send their CV, a summary of future research plans and three references to:
